

Safety Breakaway Devices

SZ Series (Cable Release) Breakaway Coupling

Safer

The unique cable control is specifically designed to trigger separation, protecting against unintended pull-aways, protecting loading arms and hose lines from stress and spills.

Cleaner

High-value fluid and gas transfer is protected by two non-return valves, positively shutting both ends instantly. This enables immediate separation, preventing product loss.

Faster

Immediate separation occurs at individually determined straight or angular pulling force. This non-destructive separation allows for easy reassembly.

- Protect hoses and connection components
- Protect loading rack facilities and personnel
- Reconnectable
- For use with tank trucks, railcars, barges, or ships
- Proven track record, more than 25 years of reliability in the industry

Shown with optional proximity switch

SPECIFICATIONS AND MATERIALS OF CONSTRUCTION

Connections	FNPT or Flange (150/300 ANSI)
Sizes	1", 2", 3", 4", 6"
Max. Pressure	150 to 360 psi
Materials	316 SST (others available upon request)
Seals	Fluorocarbon, EPDM, Chemraz®

SZ Series Breakaway Coupling Installation Example

When the line system is subjected to an unprecedented load, the levers swing out by the cable. The slide ring is displaced and the segments are released. Then the two body halves separate and the two spring-loaded valves immediately shut both hose ends.

SZ Loading Arm Marine Installation Example

Note: The length of the SZ cable must be shorter than the maximum movement of the loading arm hose in order to trigger the separation.
